CFP	 <p>A cross-sectional diagram of a curved profile. The vertical height is 16 units, and the horizontal width at the base is 16 units. The profile is shaded with diagonal lines.</p>	CPSG	 <p>A cross-sectional diagram of an L-shaped profile. The vertical leg has a height of 26 units, and the horizontal leg has a width of 26 units. The thickness of the profile is 5 units. The profile is shaded with diagonal lines.</p>
CF	 <p>A cross-sectional diagram of a curved profile. The vertical height is 22 units, and the horizontal width at the base is 22 units. The profile is shaded with diagonal lines.</p>	CPSGG	 <p>A cross-sectional diagram of an L-shaped profile. The vertical leg has a height of 36 units, and the horizontal leg has a width of 36 units. The thickness of the profile is 6 units. The profile is shaded with diagonal lines.</p>
CP	 <p>A cross-sectional diagram of a trapezoidal profile. The vertical height is 10 units, and the horizontal width at the base is 28 units. The profile is shaded with diagonal lines.</p>	CPG	 <p>A cross-sectional diagram of an L-shaped profile. The vertical leg has a height of 14 units, and the horizontal leg has a width of 36 units. The thickness of the profile is 6 units. The profile is shaded with diagonal lines.</p>
CPS	 <p>A cross-sectional diagram of an L-shaped profile. The vertical leg has a height of 16 units, and the horizontal leg has a width of 16 units. The thickness of the profile is 5 units. The profile is shaded with diagonal lines.</p>	BM	 <p>A cross-sectional diagram of a profile with a total height of 65 units. The profile is shaded with diagonal lines.</p>
